Governor's Key Department-wide Performance Measures for FY2003

Measure:
The number and percentage of total Alaska high school graduates who attend the University of Alaska.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
Goal: Within 3 years (fall 2003) enroll 26% of Alaska's high school graduates.

Of recent high school graduates fall 2001, 23% attended UA as first-time freshmen.

Benchmark Comparisons:
Several sources report projections on high school graduates with widely varying estimates. The projected number of Alaska high school graduates for the class of 2003 using WICHE is 7,261; at 26% of the high school graduates attending UA this equates to 1888 recent high graduates attending in fall 2003. Using another source (NCES Projections of Education Statistics to 2011), an estimated 1,940 students would attend UA in fall 2003. Nationally, the percentage of high school graduates who attend college soon after graduation has declined from 67% in 1996 to 63.3% for fall 2000 (Opportunity, May 2001). Forty-five percent of recent high school graduates enroll at public institutions in their home state. The University of Alaska expects to enroll 40% within six more years (fall 2007) nearly 3000 recent high school graduates.

Background and Strategies:
Recruitment efforts are important to increasing the number of full-time freshmen. A major part of recruitment is the breadth of programs available, the faculty quality, and services provided. UA is pursuing program expansions, faculty recruitments, enhanced student service and student recruitment efforts to attract this sector of traditional-aged students to curb Alaska's brain drain. The UA Scholars program has proved very successful with 371 new students enrolled and 829 total for the Fall 2001. UA has also increased the number of UA Foundation Scholarships by 28% in the last two years from $5.5 million in awards to $6.5M in awards. However, state policy can have a significant positive effect on this measure by funding the UA Scholars program. Nationally, 7% of state appropriations go to higher education grant programs. Currently, Alaska is the only state that does not provide need-or merit-based student aid. Providing need-or merit-based aid for in-state attendance would also help to keep Alaska students in-state. The table below shows the percentage of recent high school graduates who attend UA has increased from 18% in 1997 to 23% in fall 2001.

Strategy: Attracting and Retaining Alaska's Students (ongoing initiative)
UA Scholars Program

Number of Recent Alaska High School Graduates who attend UA as First-time Freshmen by Year

Year	AK HS Graduates	UA FTF who are Recent AK HS Graduates (Fall Semester)	% of AK HS Grads who are UA FTF
1997	6,175	1,097	18%
1998	6,496	1,360	21%
1999	6,826	1,486	22%
2000	6,668	1,498	22%
2001	6,812	1,558	23%

Measure:
The number and percentage of total Alaska high school graduates who attend the University of Alaska as Alaska Scholars.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
Goal: Increase the percentage of eligible UA Scholars who choose to attend UA to 50% within three years (fall 2003).

Benchmark Comparisons:
In Fall 2001, 371 (41%) of the 897 eligible UA Scholars attended the University of Alaska.
In Fall 1999, 33% (270) of the 811 eligible UA Scholars attended the University of Alaska.

Background and Strategies:
This program is designed specifically to increase the number, quality, and percentage of Alaska high school graduates attending UA. The UA Scholars Program offers a four year $11,000 scholarship to the top 10 percent of the graduates from qualified Alaska high schools each year. Students are designated by their high school based on their academic standing at the end of their junior year.

To use the Award, the Scholar must enroll at a UA campus within 16 months of high school graduation. This means the Scholar may take time off after graduation to work, travel, or even try a school outside before enrolling at the University of Alaska. Once enrolled, the Scholar will receive $1375 per semester for eight semesters provided that the Scholar remains in good standing.

The percent of eligible scholars attending the University of Alaska has increased since the start-up of the program in 1999 from 33% to 41% (see table below). The WICHE projection of the number of high school graduates in the class of 2003 is 7,261. The goal of enrolling 50% of eligible UA scholars is lofty and using WICHE's projection of graduates, the number of UA scholars enrolling would be as high as 470 by the Fall of 2003. UA is enrolling almost four times as many top 10% students than prior to the UA Scholars Program. In 1998 it was estimated that a maximum of 14% of high school graduates in the top 10% attended UA prior to the program, or about 100 students, compared to the 2001 actual achievement of 371.

Number of Eligible UA Scholars and the Attendance Rate by Fall Term

Fall Term	Number Eligible	Number Attended	Percent Attended
1999	811	270	33%
2000	875	343	39%
2001	897	371	41%
2003 *	* 958	* 470	* 50%

* Goal

Strategy: Attracting and Retaining Alaska's Students
UA Scholars Program

Measure:
The number and percentage of total Alaska high school graduates who stay in Alaska one year, five years, and 10 years after graduation from the University.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
Goal: Retention of UA baccalaureate degree graduates in Alaska at 79% residency for one year after graduation and 69% residency five years after graduation.

For UA baccalaureate graduates from 1990 to 1999 the average residency one year after graduation is 79% and 68% residency five years after graduation.
78% of 1999 graduates reside in-state one year after graduation.
65% of 1995 graduates reside in-state five-years after graduation

Benchmark Comparisons:
For UA baccalaureate graduates from 1990 to 1998 the average residency one year after graduation is 79% and 69% residency five years after graduation.

Background and Strategies:
The University of Alaska and the Alaska Department of Labor have tracked the University's baccalaureate degree recipients from fiscal year 1990 to 2000 in a joint study. The study did not distinguish between those degree recipients who were Alaska high school graduates and high school graduates from outside of Alaska; this parameter will be added next year. Of all the degree recipients currently residing in Alaska in 2000, 87% were employed. The university not only fosters learning and research, but contributes to diversifying Alaska's economy by contributing to an educated and trained workforce.

The availability of positions in the degree recipient's chosen profession will, in part, determine the continued residency in Alaska. The most recent five-year residency figure, however, is of concern as it represents the largest negative change in residency of graduates observed to date; from 68% of the 1994 class residing in Alaska to 65% for the class of 1995. Availability of various occupations is necessary to retain these trained graduates. This is a significant state policy issue and essential for economic diversification. In addition to aligning program offerings with high demand job areas, UA is investing external funding to study and present economic policy options that may help expand the availability of more diverse, well-paying occupations within the state.

The table below shows the percentage of baccalaureate degree recipients from the University of Alaska who resided in Alaska one, five, and ten years after graduating based on their Alaska permanent fund dividend status. On average, 79% of baccalaureate degree recipients resided in Alaska one year after graduation (1992-1999 graduating classes) and 68% resided in Alaska five years after graduation (1990-1995 graduating classes). Note, the actions UA and the state are taking today will favorably impact the five-year residency of the students who start between fall 1999 and fall 2002 and become part of the graduating class of spring 2007. Measuring the five-year residency impact in 2012 will best evaluate our success in this area. This demonstrates why action must start today.

Percent of Baccalaureate Degree Recipients who are Alaska Residents by Graduation Year, and Length of Residency

Graduation Year	% Residency 1 year later	% Residency 5 years later	% Residency 10 years later
1990		69%	63%
1991		69%	
1992	80%	70%	
1993	82%	68%	
1994	82%	68%	
1995	80%	65%	
1996	77%		
1997	77%		
1998	78%		
1999	78%		

Strategy: Attracting and Retaining Alaska's Students
Meeting Alaska's Employment Needs
Preparing for Alaska's Economic Success

Measure:
The percentage of students graduating with degrees in teacher education, health careers, process technology, transportation and logistics, information technology and other high-demand job areas
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
Goal: Using FY00 as the base, increase graduates by 5% over the next two years and 10% over the next 4 years in the job areas specified.

The University awarded 1,377 degrees in FY01 in high-demand job areas. Given the enrollment drop between 1994 and 1999, it is unlikely to meet the 5% goal by FY02. With enrollment on the rebound, especially in many of these programs, it is very aggressive but possible to reach the 10% target by FY04.

Benchmark Comparisons:
FY2000 - 1,530 University of Alaska degrees were conferred for high-demand job areas as defined by the Alaska Department of Labor.

Background and Strategies:
There is a lag between enrollment and completion as the programs require from two to four years to complete; therefore, enrollment in the specified programs must increase from fall 2000 before an increase in graduation from two year programs can be measured. The table below shows the number of degrees awarded in ADOL high-demand and specified occupational areas as well as enrollment. Between FY00 and FY01, enrollment increased by at least 10% in 6 programs and by at least 5% in 11 of the high demand programs. Preliminary Fall 2001 enrollment data shows positive trends in engineering , business services, early childhood development and information technology. An area of short-term success is in the early childhood development program (education assoc/cert level) where preliminary fall 2001 enrollment shows a 20% increase across the system. As final enrollment figures become available, this will be updated. The FY01 enrollment increases will begin impacting the number of graduates in FY03 through FY06.

Number of Degrees Awarded in each Fiscal Year and Fall Headcount by Job Area and Degree Level

Job Area and Degree Level	Enrollment*	Degrees Awarded (FY)			
	FY00-FY01	1998	1999	2000	2001

* In addition to the process technology program students, students enrolled in power plant, industrial technology and petroleum technology are included in this category.

Strategy: Attracting and Retaining Alaska's Students
Meeting Alaska's Employment Needs
Preparing for Alaska's Economic Success

Measure:
The number of University of Alaska graduates, by community of origin and by community of current employment, who are new teachers.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
Goal: Maintain current employment rate through 2003 and then increase the percentage of UA graduates filling teaching vacancies each year in the state by 5% per year. By 2010, place over 50% of the teachers needed each year in Alaska.

FY00 information reported by the Alaska Teachers Placement (ATP), shows 9% of vacancies in FY01 were filled by new UA graduates compared to 12%. In 1999, ATP reported that new graduates and UA alumni filled 32% of vacancies. There is not comparable information for 2000 for UA alumni placement. However, maintaining the employment rate of 32% over the next four years is not likely given the 5th year teacher program just started in FY01 and the overhaul of the baccalaureate education programs has just been accomplished this year (FY02). The baccalaureate education program enrollment is still decreasing from its elimination in 1999 with the first increase anticipated in fall 2002. The BLA and BAS enrollment in content degree areas for advancement after graduation into the 5th year teacher program is currently 230; however, not all of these students will pursue education. Beyond the yet modest education program enrollments, there is also a lack of interest of many qualified individuals to remain in the teacher profession and a lack of interest on the part of new graduates to become teachers due to pay and other working conditions.

Benchmark Comparisons:

In 1999, UA new graduates 12% of total vacancies.
In 1999, UA new graduates and Alumni filled 32% of total vacancies.

Background and Strategies:
Alaska Teacher Placement tracks the supply and demand as well as employment of teachers and administrators for Alaska school districts. This measure addresses the teacher section of the data while the next measure addresses the administrative portion (principals and superintendents).

The table below shows the total number of teaching vacancies by region and the percentage of the vacancies that were filled by UA graduates. New UA graduates are first-year teachers. In FY01 the 5th year teacher education program was first funded and in FY02 funding was invested for the redefined and more responsive baccalaureate teacher education program. Additional funding is requested in FY03 to fully fund the baccalaureate program request of FY02. The baccalaureate program enrollment is still declining with the first increase expected in the Fall 2002. UA's participation in the Alaska Center for Excellence in Schools will address both education and professional issues to improve performance in this area.

Number of Teacher Vacancies and Percent of UA Graduate Hires by Region

	1999		2000	
Region	Total Vacancies	% New UA Graduates	Total Vacancies	% New UA Graduates
Interior	227	7%	134	6%
Northwest	172	6%	171	6%
Southcentral	592	16%	359	11%
Southeast	170	11%	112	13%
Southwest	255	10%	289	9%
Total	1416	12%	1,065	9%

Strategy: Meeting Alaska's Employment Needs
Preparing for Alaska's Economic Success

Measure:
The number of University of Alaska graduates, by community of origin and by community of current employment, who are new principals or new superintendents.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
Goal: In the next three years (by 2003) place over 50% of the administrative (principal and superintendents) vacancies in Alaska school districts.

In 2000, 42% of administrative vacancies were filled by UA graduates. Reaching 50% is an aggressive goal; however, the strong enrollment increases shown in the preliminary figures this fall in the education leadership program is a positive indicator.

Benchmark Comparisons:

Using Alaska Teacher Placement (ATP) statistics 38% of the 1999 administrative (principal and superintendent) vacancies were filled with UA graduates and alumni.

Total Administrative Vacancies and Percent filled by UA Graduates

	Total Vacancies	% UA Graduates
1999	98	38%
2000	64	42%

Strategy: Meeting Alaska's Employment Needs
Preparing for Alaska's Economic Success

Background and Strategies:
Alaska Teacher Placement statistics track the supply and demand as well as employment of teachers and administrators in Alaska school districts. Administrators data includes both principals and superintendents so the portions of the measure for principals and superintendents have been combined in this analysis.

Using Alaska Teacher Placement (ATP) statistics the number of administrative vacancies filled with UA graduates and alumni has increased from 38% in 1999 to 42% in 2000 as shown in the table. Enrollment in the education leadership program has increased this fall in part due to initiative investment in FY01.

Measure:
The number and percentage of total credit hours and courses offered by distance delivery.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
Goal: Increase the number of credit hours and courses offered by distance delivery by 10% over the next three years (from Fall 2000).

Preliminary Fall 2001 information indicates there are 697 distance education courses available through the University's 15 campuses, a significant increase over last fall. Improved reporting capability overstates the growth in courses indicating more than a 50% increase, but it is likely a true increase of 20%.

Benchmark Comparisons:

Distance Education Courses Offered and Credit Hours Produced

		# of Distance Ed Courses Offered	% of MAU Total Courses Offered	Distance Ed Student Credit Hours	% of MAU Total Student Credit Hours
Fall 97	UA Anchorage	52	1.82%	3,233	2.52%
	UA Fairbanks	205	11.95%	6,441	8.73%
	UA Southeast	77	10.49%	2,445	10.34%
	UA Systemwide	334	6.30%	12,119	5.37%
Fall 98	UA Anchorage	60	2.07%	2,810	2.16%
	UA Fairbanks	195	11.22%	6,806	10.17%
	UA Southeast	84	11.54%	2,454	11.05%
	UA Systemwide	339	6.32%	12,070	5.50%
Fall 99	UA Anchorage	87	3.21%	4,008	3.12%
	UA Fairbanks	225	13.71%	7,136	10.73%
	UA Southeast	132	18.28%	4,226	19.34%

	UA Systemwide	444	8.75%	15,370	7.08%
Fall 00	UA Anchorage	68	2.56%	3,962	3.04%
	UA Fairbanks	248	14.57%	7,301	10.81%
	UA Southeast	131	17.56%	3,159	14.70%
	UA Systemwide	447	8.75%	14,422	6.58%

*Does not include yearlong correspondence students at the Center for Distance Education.

Background and Strategies:

The University of Alaska system has made significant progress in building capacity to serve students at a distance. A standardized course management system (BlackBoard) has been deployed throughout the system. Such standardization makes it possible to target faculty training and development efforts, facilitate cross-MAU instruction, and assist students in transitioning from one MAU distance course to another without having to learn a new electronic learning environment. Moreover, the University of Alaska has implemented a system-wide set of instructional tools (Adobe Acrobat, Macromedia, Fireworks, etc.) that faculty can incorporate within their electronic learning environment. This "faculty toolbox," along with a standardized course management system, was funded partially through the FY02 state appropriation increment.

In FY01 faculty development resources were allocated to assist faculty in the integration of technology and appropriate instructional strategies so that the University can increase the number of courses and programs delivered at a distance. New courses were developed in a number of areas including library science, rural development, and business administration. The priority in distance education is to transition from individual course offerings to full program/degree programs where appropriate and applicable. An example of such a model is the MA in Education Technology offered through the University of Alaska Southeast (UAS), the BA in Early Childhood Development cooperatively offered through both UAS and the University of Alaska Fairbanks, and the Micro Support Specialist AAS cooperatively offered by all three MAU's.

FY02 efforts include the development, deployment, and maintenance of the University of Alaska Distributed Education Gateway (www.online.alaska.edu). The Gateway provides a one-stop service center that enables students to identify and locate available course offerings from any campus within the University system. Prior to this service, students often contacted a number of campuses in search of a particular course or courses. The University will also integrate into the Gateway its online student services so that students may select distance education courses and register for them completely online. The University is allocating considerable time and effort toward enhancing UA's ability to share and sequence courses and programs between campuses.

Distance education is defined as any academic course whereby the instructor can provide education to students in different physical locations through any number of teaching strategies and technologies. The primary means of distance delivery are audioconference, correspondence, telecourses, and satellite telecasts. The University is also expanding the number of courses available via the Internet, CD-ROM, and/or video/audio tape. Distance education is administered at UAF by the Center for Distance Education and Independent Learning, and at UAA by Academic Technology Services. At UAS distance education is fully integrated within the University and administered through the office of the Dean of Instruction. The table in the Benchmark Comparisons section shows the number of courses that were offered at each MAU with a total for the UA System and the number of student credit hours produced, as well as the percentage of all courses and credit hours at the University of Alaska from fall 1997 to fall 2000.

Strategy: Meeting Alaska's Employment Needs

Measure:
The cost per credit hour delivered by distance delivery.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
In FY01 nearly $6.0 million of expenditures could be directly associated with the infrastructure, program support, student services, and faculty salaries used to offer courses via distance. Based on the student credit hours in

distance courses, that equates to $165 per student credit hour. For on-site instruction that figure varies from a low of $90 per credit hour to as much as $300 for specialized graduate programs. Due to the number of variables and various methods being developed around the country, the university is still working on arriving at a viable, consistant method. Once a method is accepted an appropriate target will be developed.

Benchmark Comparisons:
This costing method is just now emerging. Many universities are struggling with the same cost identification issues. In many cases the line between distance and on-site instruction cost is blurred as they are often conducted simultaneously. The method used above likely will change as industry standards are accepted and adopted.

Background and Strategies:
Distance education is a rapidly growing sector in higher education. Here in Alaska, distance education is especially useful as UA tries to make higher education available across the state's varied locations. It is also used to share specialized faculty among different campuses. The activities mentioned in the distance delivery credit hour measure above emphasize the effort UA is taking to expand distance-delivered program offerings in an efficient manner.

In assessing the cost of distance education, the University of Alaska has employed a cost analysis model developed by Western Cooperative for Educational Telecommunications (WCET) and National Center for Education Management Systems (NCHEMS).

Measure:
The pre-training wage as compared to the post-training wage for vocational education graduates.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
Goal: Maintain average salary increases of 15% for vocational education students after training.

For students who took vocational classes in 1999:
Wages increased by 20% after attendance over pre-training earnings:
$6,489 per quarter vs. $5,427 per quarter.

(Employment and wage information from the DOL for 2000 students will be available in January 2002.)

Benchmark Comparisons:
The university participates in an annual statewide vocational education outcome study by the Alaska Department of Labor published in January of each year. The study began in 1998.

Background and Strategies:
The University participates in an annual statewide vocational education outcome study produced by the Alaska Department of Labor and published each January. The second report (2000) was extended to contain pre- and post-training earnings information.

This report can be accessed at: http://www.alaska.edu/oir/voced.html. For the second report the University provided a list of over 5,900 students who participated in vocational education in FY99 and did not return in FY00. During the third and fourth quarters after exiting a vocational program, 70.3% of the participants were employed and the average quarterly earnings after training exceeded pre-training earnings by 20%. This compares favorably with the 15% increase observed for FY98 students, which is the benchmark for the goal above. Vocational education students' average quarterly earnings rose from $5,427 in months 7 to 12 of the fiscal year prior to enrollment to $6,489 per quarter in months 7 to 12 after exiting the program.

Strategy: Meeting Alaska's Employment Needs

Measure:
The amount of research grants in arctic biology, climate change, resource development, fisheries and ocean science, logistics, geosciences, and atmospheric sciences.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
Goal: Increase research grant funding commitments brought into the university in areas important to Alaska.

In FY02 UA anticipates a 10% increase in funding commitments of new grants awarded.

Benchmark Comparisons:
In FY01, there were 173 new grants awarded with total committed funding of $45.3 million in the areas of arctic biology, climate change, resource development, fisheries and ocean science, logistics, geosciences, and atmospheric sciences.

Background and Strategies:
UA conducts research in several areas important to the state. In Alaska, unlike other states, the University carries out the bulk of Research and Development (R&D) activity. In other states, industry carries out 71% of the R&D effort while universities do 13%. In Alaska, 52% of the state's R&D effort is carried out by UA. However, Alaska conducts very little R&D. Only 0.5% of Alaska's gross state product is invested in research compared to 2.5% for other states. Two reasons that may explain why Alaska is dependent on UA to support R&D are the lack of a mature manufacturing industry base and some industry R&D efforts are largely conducted out-of-state (oil and tourism, for example). Regardless of the reason, Alaska must invest strongly in R&D for future economic development and UA is the engine to fuel state R&D. Fortunately, UA leverages every $1 of state funded research with $4 of external funding. This is a significant return of state investment for research and provides a much greater R&D impact for the state.

The university has developed a database of research activity that will provide a consistent listing for comparison purposes from year to year. Many grants are multi-year awards; the table below shows the number of new grants and award amounts from FY99 to FY01 in the areas targeted in the measure. The number of new grant-funded research projects has increased by 9% from fiscal year 1999 to 2001 and the amount increased by 64% during this same time period. In total, there are 850 active grant -funded research projects for a total award commitment (multi-year) of $366 million. In FY01, on new and existing awards, there was $70 million dollars of grant-funded research performed. New research being conducted at the University ranges from projects like the Studies of Immune Function in Steller Sea Lions, Modeling Terrestrial Ecosystems, Mendenhall Glacier Dynamics, and the Effect of Herring Egg Distribution and Ecology on Year-class Strength and Adult Distribution.

Number and Amount of New Organized Research Projects by Research Category Fiscal Year 1999 – 2001

Category	New Awards	Award Amt. (x$1000)
Areas of Significant Importance to Alaska		
Resource Development	33	1,980.0

Strategy: Preparing for Alaska's Economic Success

Measure:
The number of graduate students whose education is funded by research grants.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
Goal: Increase the number of grant-funded graduate students by 10% over the next two years.

189 graduate students were employed in fall 2001.

Benchmark Comparisons:
Based on the University's federal reporting date, 164 graduate students were employed on grant-funded research in fall 1998, 192 in fall 1999, and 183 in fall 2000. Using the last three-year average (180), a 10 percent increase would result in 200 graduate students employed with research funding in fall 2002.

Background and Strategies:
At the University of Alaska during fall 2001 there were 189 graduate students funded through 118 research grants. The enrollment of graduate students increased by 9.5% from fall 1998 to fall 2001. Of the graduate students, the number of first-time master's students increased during the same time period by 13.2%.

Number of Graduate Students Funded on Research Grants

	Fall Semester			
	1998	**1999**	**2000**	**2001**
Number of Graduate Students	164	192	183	189
Percent of Total Graduate Students	13%	15%	14%	14%

Measure:
The occurrences of applied research benefiting the state's economy.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
Goal: Increase the number of applied research projects specifically benefiting the economy of Alaska.

Due to the number of variables and various methods being developed around the country, the university is still working on arriving at a viable, consistant method. Once a method is accepted an appropriate target will be developed.

Benchmark Comparisons:
Establishing an appropriate benchmark for this measure will take additional time. There were 306 applied research projects reported as benefiting Alaska's economy. Next year an additional definition of economic benefit that includes patents, business start-up, and product development will be added. Projects under this more direct definition will help refine and categorize the applied research projects reported as benefiting Alaska's economy.

Background and Strategies:

Performance in this area is challenging to measure but of critical importance to the University and to the economic development and diversification of the state. Demonstration of progress on this performance measure is shown in the form of a selected listing of specific projects with their corresponding contribution to the state. There were a total of 306 projects reported with potential economic benefit to Alaska during the last three years. Additionally, the state's funding match and the National Science Foundation award to UA for the Experimental Program to Stimulate Competitive Research (EPSCoR) is enhancing UA's capacity in areas of applied research focused on Alaska's needs. The following table outlines a few of the applied research projects benefiting the state's economy.

Selected Applied Research Projects Benefiting Alaska's Economy

Project Title, Status, and School	Contribution to the State
UA Anchorage	
Tourism and Recreation in Southcentral Alaska: Patterns and prospects Funded by USDA/USFS Complete CBPP, ISER	Examines the continuing prospects for growth in what was Alaska's fastest-growing basic industry (as measured by jobs created) in the 1990s.
Planning and Operating Small Fish-Processing Plants in Villages Complete CBPP, ISER	Details the complexities involved for small villages attempting to start small fish-processing plants; many coastal communities are considering such plants as a means of creating jobs and income.
Telemaintenance for Utility Services in Rural Alaska Villages Funded by AT&T Foundation Active CBPP, ISER	Costs of operating and maintaining Alaska's small rural utilities are very high; this project will assess whether telecommunications can sometimes be used to help local residents diagnose problems, reducing the need for utilities to fly people and equipment into villages.
Virtual Enterprise Manufacturing Funded by Small Business Innovation Research Engineering Company Active CBPP, SBDC	Qualified 42 Alaska companies to participate in the manufacturing of aging weapon systems for the Department of Defense, such as tank wheel sprockets, engine helicopter mounts, etc.
UA Fairbanks	
Utilizing Alaska's by-catch: Developing processes for textured, cooked minces for food service application Funded by USDA/CREES Active School of Fisheries and Ocean Sciences/Fishery Industrial Technology Center	Complete utilization of catch is not only economically desirable, but is becoming a legal requirement. This project is exploring value-added products using Alaska fish by-catch.
Horticultural Plant Production in Alaska Completed School of Agriculture and Land Resources Management/Agricultural and Forestry Experiment Station	This research is used to identify hardy perennials, disease resistant annual flowers and high quality vegetables for home and commercial use. The cosmos/photoperiod study will lengthen the commercial production season for producers of field-grown cut flowers.
Tree Species Growth & Yield and Site Productivity for the Alaska Northern Forest Active School of Agriculture and Land Resources Management/Agricultural and Forestry Experiment Station	Forest growth and yield data, essential for sustainable management of the forest resource, are being collected. The new data coupled with initial stocking are becoming available to assist managers to make better decisions regarding initial silvicultural treatments to obtain adequate regeneration. With this data, Alaska Forest Refinery, Inc. is pursuing finances to construct a wood refinery in the Tok area, where unemployment is chronic. The major product is ethanol to meet the biofuel demand.
Center for Nanosensor Technology (CNT) Funded by U.S. Department of Defense Microelectronic Activity Active College Science Engineering and Mathematics (CSEM)	Develop technology that creates several high paying professional jobs and attracts industry to Alaska. The sensors will be used for monitoring human health and the environment within the state.

Project Title, Status, and School	Contribution to the State
UA Southeast	
Effects of Total Dissolved Solids on Salmonids Funded by North Coast, Inc. Active Natural Sciences and JCSFOS	Research funded by ASTF to help ADF&G and ADEC to set regulations for the levels of total dissolved solids that can be discharged by industry into state waters. Research is investigating the effects of dissolved salts on the short- and long-term effects on developing salmonids.
Rapid Assessment of Floating Kelps in Alaska Proposed Natural Sciences	Research funded by NASA to develop a mapping technique for floating kelps in SE Alaska. Results will allow ADF&G to manage the kelp resources for commercial harvest.
Regulation of molting in the snow crab Active Natural Sciences	Research funded by ADF&G to determine whether male crabs that are morphometrically and reproductively mature can be induced to molt. Information will be used to develop harvesting guidelines for snow crab
Diving behavior of sea otters in southeastern Alaska Current Natural Sciences	This study is analyzing data on the foraging ecology of sea otters. The data will help predict and assess impacts of sea otters on shellfish populations in Alaska.

Measure:
The quality of research as measured by annual citation and significant publications in referred journals.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
Goal: Maintain the number and quality of publications by UA faculty.

In 2000, 415 publications were tabulated in two major indexes and, since 1999, units within the University reported a total of 856.

Benchmark Comparisons:
The university is currently working on a benchmark.

Background and Strategies:
There are two ways in which to display the number of publications produced by UA faculty; one is by searching databases of publication indexes and the other a list of the number of faculty publishing and the journals in which they are publishing.

The table below shows the result of searches done on two major indexes for journal publications of University of Alaska faculty and research staff in 1999 and 2000. The Institute for Scientific Information (ISI) index includes scholarly publications in the social sciences, sciences and the arts and humanities. The number of publications has increased by 3% in Cambridge Scientific Abstracts (CSA) and by 20% in ISI from 1999 to 2000.

Number of Publications by Index and Year of Publication

Index	1999	2000
Cambridge Scientific Abstracts (CSA)		
Aquatic Sciences and Fisheries Abstracts (ASFA)	44	36
Biological Sciences	52	61
Environmental Sciences and Pollution Management	45	53
MEDLINE	25	31
Oceanic Abstracts	29	23
Plant Science	10	13
TOXLINE	5	

Total CSA	210	217
Institute for Scientific Information (ISI) Total	346	415

The table below shows a summarization from the units that 260 faculty per year published 856 journal articles since 1999 in at least 90 different publications including Nature, Zoology, Critical Care Nurse, Journal of Cold Regions Engineering, ARCTIC, and Teacher Education and Practice. Some of the publications included books or chapters for books.

Number of Published Faculty and Number of Publications by MAU and School/College Since 1999

Measure:
The graduation and retention rate of full-time-equivalent students in degree programs.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
This data addresses the graduation rate portion of this measure.

Goal: Starting with the 1999-2000 first-time freshmen class, increase six-year graduation rates (by 2006) for baccalaureate degree-seeking first- time freshmen to 30%.

The six-year graduation rate for the class of 1994 is 21.2%.

Benchmark Comparisons:
The latest information available for six-year graduation rates are for the class of 1993 showing 26% of the first-time freshmen graduated within six years.

Background and Strategies:
The participation in the Consortium for Student Retention Data Exchange (CSRDE), a national survey which tracks the retention of first-time full-time baccalaureate degree-seeking freshmen from fall to fall, also tracks the graduation rate of those students. Retention rates drive the graduation rates and UA is closely monitoring retention. Improved programs that were put in place during the last three years will affect the six-year graduation rate for the 1999 cohort with the results available in summer 2006. The most recent rates available from CSRDE show a six-year graduation rate for the cohort of first-time full-time baccalaureate degree-seeking freshmen that started fall 1994 at UA is 21.2% compared to the 33.1% average graduation rate at 92 less selective institutions (indicating open admissions and high part-time enrollment). Students note that program availability is a primary reason for changing institutions. In the last three years UA has invested significantly in expanding program breadth and having adequate upper-division course offerings. These actions coupled with the effort of retaining students will impact this measure positively.

Year	Headcount	Six-Year Graduation Rate	CSRDE Less Selective Six-Year Graduation Rate
1993-94	846	26.5%	33.6%
1994-95	903	21.2%	33.1%

UA anticipates a graduation rate of 30% with the 1999-00 class. By 2006 there will be 302 graduates from this cohort compared to 191 from the 1994-95 cohort.

Measure:
The graduation and retention rate of full-time-equivalent students in degree programs.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
This data addresses the retention portion of this measure.

Goal: Over three years (from 2000), increase retention rate for baccalaureate degree-seeking first-time freshmen to 71%.

UA system wide retention rate of first-time full-time baccalaureate degree-seeking freshmen in 2000-2001 is 67.8%.

Benchmark Comparisons:
The University participates in the Consortium for Student Retention Data Exchange (CSRDE), a national survey which tracks the retention of first-time full-time baccalaureate degree seeking freshmen from fall to fall. In the most recent CSRDE survey (May 2001) 92 institutions described as less selective (indicating open admissions and high part-time enrollment) had an average retention rate for the 1993 - 1999 cohorts from the first year to second of 68.7%. Other studies have shown lower retention rates, but for a less well-defined group of students. For example, in the August 2001 Opportunity, the average persistence rate to the second year for freshmen who began in fall 1999 was 60.6% for 152 four-year institutions with an open admissions policy.

Background and Strategies:

A National Center for Education Statistics report (August 2001) found that the strongest predictor of degree attainment, and thus retention, was the academic preparation from high school. Nationally, in general, the retention rate to the second year has been decreasing. The table below shows the retention rate for UA as well as the CSRDE less selective institutions from 1993 through 2001. UAS exceeded the 71% goal this fall by retaining nearly 72% of first-time full-time baccalaureate degree seeking students from fall 2000 to fall 2001 compared to 59% from fall 1999 to fall 2000. In addition the number of students enrolled in this well-defined cohort has increased by 33% from 1993 to 2000.

UA Retention Rate of First-time full-time, Baccalaureate Degree-Seeking Freshmen:

Year	Headcount	Percent Retained to 2nd Year	CSRDE Less Selective Retention Rate to 2nd Year
1993-94	846	66.4%	68.2%
1994-95	903	62.9%	67.1%
1995-96	827	67.0%	67.9%
1996-97	913	67.8%	69.0%
1997-98	871	64.8%	70.2%
1998-99	1,015	62.9%	69.5%
1999-00	1,008	67.6%	68.7%
2000-01	1,127	67.8%	
% Change 93 - 01	33%		
% Change 98 - 01	11%		

** Data for 1993 - 1998 may differ from previously reported numbers as that information was updated using consistent methodologies with current definitions.

Strategy: Attracting and Retaining Alaska's Students

Measure:
The comparative scores of students who take professional examinations.
Sec 152 Ch 90 SLA 2001(HB 250)

Alaska's Target & Progress:
Goal: Meet or exceed the appropriate national average on scoring or pass rates for students who take professional exams, shown on the table in the Background and Strategies section.

Benchmark Comparisons:
For programs requiring exit or professional exams, the benchmark is appropriate national or state scores and/or pass rates.

Background and Strategies:
The university is in the process of identifying and collecting the scores and pass rates of students on the professional exams administered. This is not a single measure, but rather a listing of programs that administer professional exams and the resultant scores or pass rates as appropriate. The table below lists the name of the test, the number of students who were administered the test, the average score and/or pass rate at UA, as well as the national comparison when it was available. Out of the 34 tests results reported, 17 have national comparisons and 16 of 17 programs show results above national average. For 7 of the 17 tests without a national comparison, UA students completed with a 100% pass rate. In general, UA students meet or exceed the national scores and pass rates.

Number of Students Taking Professional Exams by MAU and School, Exam Type, and Pass Rates (Both UA and National)

MAU/School	Examination Type	Test Date	UA Students Tested	UA Pass Rate	National Pass Rate
UAA-CBPP	CPA	November 1999	13	23%[1]	14%[2]

UAS	National Cert. Exam for Health Info. Mgmt.	2001	3	100%	
UAS	Nursing Aide Registry (CNA)		11	91%	NA
UAS	CISCO Certified Academy Institute (CCAI)		1	100%	NA
UAS	Water and Wastewater Operator Cert.			83%[6]	64%[7]

1 This number represents the percent of individuals from UA taking the CPA exam for the first time who passed all four sections of the test in one sitting.

2 This number represents the national percentage of individuals taking the CPA exam for the first time who passed all four sections in one sitting.

3 2001 Pass rate to date = 98%; 2000 Pass rate overall = 88%

4 Four of the five who were initially unsuccessful have since passed the exam; the fifth has not yet re-attempted the exam.

5 2000 Pass rate; Winter 1999 graduates actually took the exam in 2000.

6 UA average since 1998.

7 Pass rate at state level.

Measure:

Over the next three years, increase enrollments by 5%.

Alaska's Target & Progress:

Preliminary Fall 2001 enrollment figures indicate an increase of 3.2% in FTE over Fall 2000 and 4.5% over Fall 1999.

Fall Semester
-Student FTE 1999: 14,784
-Student FTE 2000: 14,939
-Student Headcount 1999: 30,249
-Student Headcount 2000: 30,480
(Fall 2000 reflects the current status, as Fall 2001 final fall semester data will not be available until Jan. 2002).

Benchmark Comparisons:
Student FTE Fall Semester 1997: 14,784
Student FTE Fall Semester 1998: 14,939

Headcount Fall Semester 1997: 31,184
Headcount Fall Semester 1998: 31,106

Background and Strategies:
The University, as the provider of community college and university higher education mission for the state, serves both traditional and non-traditional aged students. Traditional students make up 35% of student headcount and are focused more on baccalaureate programs. Non-traditional age students make up 65% of UA's student headcount and are more focused on graduate instruction, associate degrees, and other professional development.

The University is increasing the student population by expanding degree program offerings in areas targeted as most important to the economy of the state, including information technology, nursing, education, finance, e-commerce, and wildlife. Currently, UA offers less than half of the degree programs of other western states with smaller populations. In the last year, however, with the investment of initiative funding, the Board of Regents has approved 28 new degree programs, while eliminating 5 programs for a net increase of 23 degree programs. Having the appropriate breadth of relevant degree programs in the state is key to increasing the student headcount. Another area UA is pursuing to increase the number of students is enhanced student services in recruitment, retention, financial aid, advising, and standard electronic student services.

UA has budgeted for a 5% percent increase in enrollment in FY03. Enrollment increases contribute to tuition, which in turn helps fund programs, salary maintenance, and fixed cost increases. Continued program growth and base investment is necessary to reach this enrollment target.

Key Performance Measures for FY2003

Measure:
Increase degrees awarded at the UAA BRU

Alaska's Target & Progress:

	% Inc/Dec over prior year
ANC - FY98 - 1,717 degrees awarded	5.64%
ANC - FY99 - 1,659 degrees awarded	(3.38%)
ANC - FY00 - 1,503 degrees awarded	(9.40%)

Measure:
Increase degrees awarded at the Anchorage Campus

Alaska's Target & Progress:
ANC - FY98 - 1,533 degrees awarded
ANC - FY99 - 1,457 degrees awarded
ANC - FY00 - 1,339 degrees awarded

Measure:
Increase degrees awarded at Kenai Peninsula College.

Alaska's Target & Progress:
KPC - FY98 - 66 degrees awarded
KPC - FY99 - 76 degrees awarded
KPC - FY00 - 45 degrees awarded

Measure:
Increase degrees awarded at Kodiak College.

Alaska's Target & Progress:
KOC - FY98 - 17 degrees awarded
KOC - FY99 - 21 degrees awarded
KOC - FY00 - 20 degrees awarded

Measure:
Increase degrees awarded at Mat-Su College.

Alaska's Target & Progress:
MSC - FY98 - 80 degrees awarded
MSC - FY99 - 92 degrees awarded
MSC - FY00 - 75 degrees awarded

Measure:
Increase degrees awarded at PWSCC

Alaska's Target & Progress:
PWSCC - FY98 - 21 degrees awarded
PWSCC - FY99 - 13 degrees awarded
PWSCC - FY00 - 24 degrees awarded

Measure:
Increase UAA BRU student headcount by 3%.

Alaska's Target & Progress:

	% Inc/Dec over prior year
UAA - Fall 1998 headcount was 19,063 (including Military).	5.98%
UAA - Fall 1999 headcount was 18,339 (including Military).	(3.80%)
UAA - Fall 2000 headcount was 18,268 (including Military).	(0.39%)

Measure:
Increase Anchorage Campus student headcount by 3%.

Alaska's Target & Progress:
ANC - Fall 1998 headcount was 13,907 (including Military).
ANC - Fall 1999 headcount was 13,456 (including Military).
ANC - Fall 2000 headcount was 13,263 (including Military).

Measure:
Increase Kenai Campus student headcount by 3%

Alaska's Target & Progress:
KPC - Fall 1998 headcount was 1,619
KPC - Fall 1999 headcount was 1,453
KPC - Fall 2000 headcount was 1,559

Measure:
Increase Kodiak College student headcount by 3%.

PWSCC - Fall 1999 headcount was 1,552
PWSCC - Fall 2000 headcount was 1,459

Measure:
Increase UAA BRU credit hour production by 3%.

Alaska's Target & Progress:

	% Inc/Dec over prior year
UAA - Fall 1998 credit hour production was 130,313	1.59%
UAA - Fall 1999 credit hour production was 128,645	(1.28%)
UAA - Fall 2000 credit hour production was 130,211	1.22%

Measure:
Increase Anchorage Campus credit hour production by 3%.

Alaska's Target & Progress:
ANC - Fall 1998 credit hour production was 106,129 (includes military)
ANC - Fall 1999 credit hour production was 105,577 (includes military)
ANC - Fall 2000 credit hour production was 105,699 (includes military)

Measure:
Increase Kenai Campus credit hour production by 3%.

Alaska's Target & Progress:
KPC - Fall 1998 credit hour production was 9,027
KPC - Fall 1999 credit hour production was 7,943
KPC - Fall 2000 credit hour production was 8,602

Measure:
Increase Kodiak College credit hour production by 3%.

Alaska's Target & Progress:
KOC - Fall 1998 credit hour production was 2,385
KOC - Fall 1999 credit hour production was 2,168
KOC - Fall 2000 credit hour production was 2,909

Measure:
Increase Mat-Su College credit hour production by 3%.

Alaska's Target & Progress:
MSC - Fall 1998 credit hour production was 8,289
MSC - Fall 1999 credit hour production was 8,853
MSC - Fall 2000 credit hour production was 9,102

Measure:
Increase Prince William Sound credit hour production by 3%.

Alaska's Target & Progress:
PWSCC - Fall 1998 credit hour production was 4,484
PWSCC - Fall 1999 credit hour production was 4,104
PWSCC - Fall 2000 credit hour production was 3,899

Measure:
Increase non-general fund revenues for UAA BRU.

Alaska's Target & Progress:
UAA - FY99 NGF revenues as % of total MAU expenditures - 55.3% $74,238.1
UAA - FY00 NGF revenues as % of total MAU expenditures - 55.1% $76,016.9
UAA - FY01 NGF revenues as % of total MAU expenditures - 44.4% $84,465.0

Measure:
Increase non-general fund revenues at the Anchorage Campus.

Alaska's Target & Progress:
ANC - FY99 NGF revenues as % of total expenditures - 56.91% $66,739.9
ANC - FY00 NGF revenues as % of total expenditures - 57.31% $68,479.7
ANC - FY01 NGF revenues as % of total expenditures - 56.84% $76,221.9

Measure:
Increase non-general fund revenues at Kenai Peninsula College.

Alaska's Target & Progress:

KPC - FY99 NGF revenues as % of total expenditures - 42.6% $2,489.4
KPC - FY00 NGF revenues as % of total expenditures - 41.8% $2,527.3
KPC - FY01 NGF revenues as % of total expenditures - 40.99% $2,473.4

Measure:
Increase non-general fund revenues at Kodiak College

Alaska's Target & Progress:
KOC - FY99 NGF revenues as % of total expenditures - 25.98% $599.3
KOC - FY00 NGF revenues as % of total expenditures - 21.99% $452.8
KOC - FY01 NGF revenues as % of total expenditures - 29.08% $760.3

Measure:
Increase non-general fund revenues at Mat-Su College.

Alaska's Target & Progress:
MSC - FY99 NGF revenues as % of total expenditures - 44.36% $1,934.9
MSC - FY00 NGF revenues as % of total expenditures - 48.21% $2,331.1
MSC - FY01 NGF revenues as % of total expenditures - 49.12% $2,497.6

Measure:
Increase non-general fund revenues at PWSCC

Alaska's Target & Progress:
PWSCC - FY99 NGF revenues as % of total expenditures - 61.37% $2,474.6
PWSCC - FY00 NGF revenues as % of total expenditures - 58.57% $2,226.0
PWSCC - FY01 NGF revenues as % of total expenditures - 60.45% $2,511.8

Key Performance Measures for FY2003

Measure:
Increase UAF BRU headcount by 3%

Alaska's Target & Progress:

	% Inc/Dec over prior year
UAF - Fall 1998headcount was 10,364	15.01%
UAF - Fall 1999 headcount was 10,436	0.69%
UAF - Fall 2000 headcount was 10,764	3.14%

Measure:
Increase Bristol Bay Campus headcount by 3%

Alaska's Target & Progress:
BB - Fall 1998headcount was 475
BB - Fall 1999 headcount was 589
BB - Fall 2000 headcount was 531

Measure:
Increase Chukchi Campus headcount by 3%

Alaska's Target & Progress:
CC - Fall 1998 headcount was 169
CC - Fall 1999 headcount was 249
CC - Fall 2000 headcount was 216

Measure:
Increase Fairbanks Campus headcount by 3%

Alaska's Target & Progress:
FC - Fall 1998 headcount was 5,110
FC - Fall 1999 headcount was 4,957
FC - Fall 2000 headcount was 4,938

Measure:
Increase Interior-Aleutians Campus headcount by 3%

Alaska's Target & Progress:
IC - Fall 1998 headcount was 689
IC - Fall 1999 headcount was 627
IC - Fall 2000 headcount was 676

Measure:
Increase Kuskokwim Campus headcount by 3%

Alaska's Target & Progress:
KU - Fall 1998 headcount was 366
KU - Fall 1999 headcount was 334
KU - Fall 1999 headcount was 335

Measure:
Increase Northwest Campus headcount by 3%

Alaska's Target & Progress:
NW - Fall 1998 headcount was 291
NW - Fall 1999 headcount was 360
NW - Fall 2000 headcount was 523

Measure:
Increase Rural College headcount by 3%

Alaska's Target & Progress:
RC - Fall 1998 headcount was 731
RC - Fall 1999 headcount was 721
RC - Fall 2000 headcount was 819

Measure:
Increase Tanana Valley Campus headcount by 3%

Alaska's Target & Progress:
TV - Fall 1998 headcount was 2,533
TV - Fall 1999 headcount was 2,601
TV - Fall 2000 headcount was 2,726

Measure:
Increase UAF credit hour production by 3%.

Alaska's Target & Progress:

	% Inc/Dec over prior year
UAF - Fall 1998 credit hour production was 66,950	(9.29%)
UAF - Fall 1999 credit hour production was 66,487	(0.69%)
UAF - Fall 2000 credit hour production was 67,569	1.63%

Measure:
Increase Bristol Bay credit hour production by 3%.

Alaska's Target & Progress:
BB - Fall 1998 credit hour production was 1,074
BB - Fall 1999 credit hour production was 1,398
BB - Fall 2000 credit hour production was 1,231

Measure:
Increase Chukchi Campus credit hour production by 3%.

Alaska's Target & Progress:
CC - Fall 1998 credit hour production was 559
CC - Fall 1999 credit hour production was 700
CC - Fall 2000 credit hour production was 790

Measure:
Increase Fairbanks Campus credit hour production by 3%.

Alaska's Target & Progress:
FC - Fall 1998 credit hour production was 46,298
FC - Fall 1999 credit hour production was 44,564
FC - Fall 2000 credit hour production was 44,212

Measure:
Increase Interior-Aleutians Campus credit hour production by 3%.

Alaska's Target & Progress:
IC - Fall 1998 credit hour production was 1,497
IC - Fall 1999 credit hour production was 1,985
IC - Fall 2000 credit hour production was 2,115

Measure:
Increase Kuskokwim Campus credit hour production by 3%.

Alaska's Target & Progress:
KU - Fall 1998 credit hour production was 1,629
KU - Fall 1999 credit hour production was 1,344
KU - Fall 2000 credit hour production was 1,762

Measure:
Increase Northwest Campus credit hour production by 3%.

Alaska's Target & Progress:
NW - Fall 1998 credit hour production was 752
NW - Fall 1999 credit hour production was 1,089
NW - Fall 2000 credit hour production was 1,367

Measure:
Increase Rural College credit hour production by 3%.

Alaska's Target & Progress:
RC - Fall 1998 credit hour production was 2,618
RC - Fall 1999 credit hour production was 2,506
RC - Fall 2000 credit hour production was 2,808

Measure:
Increase Tanana Valley Campus credit hour production by 3%.

Alaska's Target & Progress:
TV - Fall 1998 credit hour production was 12,523
TV - Fall 1999 credit hour production was 13,205
TV - Fall 2000 credit hour production was 13,284

Measure:
Increase UAF degrees awarded.

Alaska's Target & Progress:

	% Inc/Dec over prior year
UAF - FY98 - 753 degrees awarded	0.69%
UAF - FY99 - 641 degrees awarded	(13.89%)
UAF - FY00 - 634 degrees awarded	3.98%

Measure:
Increase UAF non-general fund revenues.

Alaska's Target & Progress:
UAF - FY99 NGF revenues as % of total BRU expenditures - 61.6% $129,533.1
UAF - FY00 NGF revenues as % of total BRU expenditures - 62.5% $137,882.0
UAF - FY01 NGF revenues as % of total BRU expenditures - 64.9% $166,298.0

Measure:
Increase Cooperative Extension Service non-general fund revenues.

Alaska's Target & Progress:
CES - FY99 NGF revenues as % of total expenditures - 49.8% $2,762.6
CES - FY00 NGF revenues as % of total expenditures - 48.0% $2,532.5
CES - FY01 NGF revenues as % of total expenditures - 41.4% $2,085.4

Measure:
Increase Bristol Bay Campus non-general fund revenues.

Alaska's Target & Progress:
BB - FY99 NGF revenues as % of total expenditures - 42.6% $357.7
BB - FY00 NGF revenues as % of total expenditures - 28.3% $342.6
BB - FY01 NGF revenues as % of total expenditures - 30.0% $362.0

Measure:
Increase Chukchi Campus non-general fund revenues.

Alaska's Target & Progress:
CC - FY99 NGF revenues as % of total expenditures - 8.7% $ 54.5
CC - FY00 NGF revenues as % of total expenditures - 9.6% $ 60.4
CC - FY01 NGF revenues as % of total expenditures -17.2% $119.6

Measure:
Increase Fairbanks Campus non-general fund revenues.

Alaska's Target & Progress:
FC - FY99 NGF revenues as % of total expenditures - 52.9% $61,868.0
FC - FY00 NGF revenues as % of total expenditures - 52.3% $66,696.3
FC - FY01 NGF revenues as % of total expenditures - 54.6% $76,821.5

Measure:
Increase Fairbanks Organized Research non-general fund revenues.

Alaska's Target & Progress:
FOR - FY99 NGF revenues as % of total expenditures - 84.30% $58,158.5
FOR - FY00 NGF revenues as % of total expenditures - 82.17% $61,990.7
FOR - FY01 NGF revenues as % of total expenditures - 86.9% $79,444.1

Measure:
Increase Interior-Aleutians Campus non-general fund revenues.

Alaska's Target & Progress:
IC - FY99 NGF revenues as % of total expenditures - 55.9% $1,131.4
IC - FY00 NGF revenues as % of total expenditures - 47.7% $ 971.6
IC - FY01 NGF revenues as % of total expenditures - 46.2% $ 932.5

Measure:
Increase Kuskokwim Campus non-general fund revenues.

Alaska's Target & Progress:
KU - FY99 NGF revenues as % of total expenditures - 38.1% $1,150.4
KU - FY00 NGF revenues as % of total expenditures - 40.0% $1,152.4
KU - FY01 NGF revenues as % of total expenditures - 39.9% $1,291.8

Measure:
Increase Northwest Campus non-general fund revenues.

Alaska's Target & Progress:

NW - FY99 NGF revenues as % of total expenditures - 14.5% $199.1
NW - FY00 NGF revenues as % of total expenditures - 15.3% $233.2
NW - FY01 NGF revenues as % of total expenditures - 25.8% $440.0

Measure:
Increase Rural College non-general fund revenues.

Alaska's Target & Progress:
RC - FY99 NGF revenues as % of total expenditures - 41.2% $1,403.3
RC - FY00 NGF revenues as % of total expenditures - 43.3% $1,494.9
RC - FY01 NGF revenues as % of total expenditures - 39.8% $1,843.5

Measure:
Increase Tanana Valley Campus non-general fund revenues.

Alaska's Target & Progress:
TV - FY99 NGF revenues as % of total expenditures - 54.3% $2,447.6
TV - FY00 NGF revenues as % of total expenditures - 50.3% $2,407.4
TV - FY01 NGF revenues as % of total expenditures - 53.7% $2,957.6

Key Performance Measures for FY2003

Measure:
Increase UAS Student Headcount by 3.2% by FY2003.

Alaska's Target & Progress:
UAS - Headcount for Fall 1998 was 4,337.
UAS - Headcount for Fall 1999 was 4,162.
UAS - Headcount for Fall 2000 was 4,330.

Benchmark Comparisons:
No institutions with comparable number and structure of campuses were found.

Measure:
Increase Juneau Student Headcount by 5.0% by FY2003.

Alaska's Target & Progress:
JC - Headcount for Fall 1998 was 2,604.
JC - Headcount for Fall 1999 was 2,515.
JC - Headcount for Fall 2000 was 2,754.

Benchmark Comparisons:
No institutions of comparable size and mission were found

Measure:
Increase Ketchikan Student Headcount by 3.0% by FY2003.

Alaska's Target & Progress:
KE - Student Headcount for Fall 1998 was 576.
KE - Student Headcount for Fall 1999 was 549.
KE - Student Headcount for Fall 2000 was 465.

Benchmark Comparisons:
No institutions of comparable size and mission were found.

Measure:
Increase Sitka Student Headcount by 3.0% by FY2003.

Alaska's Target & Progress:
SC - Student Headcount for Fall 1998 was 1,315.
SC - Student Headcount for Fall 1999 was 1,251.
SC - Student Headcount for Fall 2000 was 1,265.

Benchmark Comparisons:
No institutions of comparable size and mission were found.

Measure:
Increase UAS Student Credit Hours by 3.0% by FY2003.

Alaska's Target & Progress:
UAS - Student Credit Hours for Fall 1998 was 22,205.

UAS - Student Credit Hours for Fall 1999 was 21,851.
UAS - Student Credit Hours for Fall 2000 was 21,486.

Benchmark Comparisons:
No institutions with comparable number and structure of campuses were found

Measure:
Increase Juneau Student Credit Hours by 3.0% by FY2003.

Alaska's Target & Progress:
JC - Student Credit Hours for Fall 1998 was 15,105.
JC - Student Credit Hours for Fall 1999 was 15,038.
JC - Student Credit Hours for Fall 2000 was 15,398.

Benchmark Comparisons:
No institutions of comparable size and mission were found.

Measure:
Increase Ketchikan Student Credit Hours by 3.0% by FY2003.

Alaska's Target & Progress:
KE - Student Credit Hours for Fall 1998 was 2,330.
KE - Student Credit Hours for Fall 1999 was 2,414.
KE - Student Credit Hours for Fall 2000 was 2,017.

Benchmark Comparisons:
None available at this time.

Measure:
Increase Sitka Student Credit Hours by 3.0% by FY2003.

Alaska's Target & Progress:
SC - Student credit Hours for Fall 1998 was 4,771.
SC - Student credit Hours for Fall 1999 was 4,400.
SC - Student credit Hours for Fall 2000 was 4,071.

Benchmark Comparisons:
None available at this time.

Measure:
Increase UAS Certificates and Degrees Awarded by 10.0% by FY2003.

Alaska's Target & Progress:
UAS - Total Certificates and Degrees awarded in FY1998 was 204.
UAS - Total Certificates and Degrees awarded in FY1999 was 214.
UAS - Total Certificates and Degrees awarded in FY2000 was 259.

Benchmark Comparisons:
No institutions with comparable number and structure of campuses were found.

Measure:
Increase Juneau Certificates and Degrees Awarded by 10.0% by FY2003.

Alaska's Target & Progress:
JC - Total Certificates and Degrees awarded in FY1998 was 152.
JC - Total Certificates and Degrees awarded in FY1999 was 181.
JC - Total Certificates and Degrees awarded in FY2000 was 227.

Benchmark Comparisons:
No institutions of comparable size and mission were found.

Measure:
Increase Ketchikan Certificates and Degrees Awarded by 10.0% by FY2003.

Alaska's Target & Progress:
KC - Total Certificates and Degrees awarded in FY1998 was 28.
KE - Total Certificates and Degrees awarded in FY1999 was 4.
KE - Total Certificates and Degrees awarded in FY1998 was 14.

Benchmark Comparisons:
None available at this time.

Measure:
Increase Sitka Certificates and Degrees Awarded by 10.0% by FY2003.

Alaska's Target & Progress:
SC - Total Certificates and Degrees awarded in FY1998 was 24.
SC - Total Certificates and Degrees awarded in FY1999 was 29.
SC - Total Certificates and Degrees awarded in FY2000 was 18.

Benchmark Comparisons:
None available at this time.

Measure:
Increase UAS percentage of expenditures from non general fund sources by 5.0% by FY2003.

Alaska's Target & Progress:
UAS - % of total expenditures funded from non general funds in FY1999 was 44.78%. $11.187.3
UAS - % of total expenditures funded from non general funds in FY2000 was 44.34%. $11,361.5
UAS - % of total expenditures funded from non general funds in FY2001 was 45.28%. $13,305.0

Benchmark Comparisons:
No institutions of comparable size and mission were found.

Measure:
Increase Juneau percentage of expenditures from non general fund sources by 5.0% by FY2003.

Alaska's Target & Progress:
JC - % of total expenditures funded from non general funds in FY1999 was 42.63%. $7,607.0
JC - % of total expenditures funded from non general funds in FY2000 was 42.10%. $7,854.5
JC - % of total expenditures funded from non general funds in FY2001 was 41.75%. $9,001.1

Benchmark Comparisons:
No institutions of comparable size and mission were found.

Measure:
Increase Ketchikan percentage of expenditures from non general fund sources by 3.0% by FY2003.

Alaska's Target & Progress:
KE - % of total expenditures funded from non general funds in FY1999 was 42.58%. $1,089.1
KE - % of total expenditures funded from non general funds in FY2000 was 41.31%. $1,040.6
KE - % of total expenditures funded from non general funds in FY2001 was 38.35%. $1,024.1

Benchmark Comparisons:
None available at this time.

Measure:
Increase Sitka percentage of expenditures from non general fund sources by 5.0% by FY2003.

Alaska's Target & Progress:
SC - % of total expenditures funded from non general funds in FY1999 was 58.32%. $2,491.2
SC - % of total expenditures funded from non general funds in FY2000 was 57.98%. $2,466.4
SC - % of total expenditures funded from non general funds in FY2001 was 63.64%. $3,279.8

Benchmark Comparisons:
